Executive Summary

This report summarizes results from the NYCHA Permanent Affordability Commitment Together (PACT) Program Post-Construction (PC) Survey conducted at the ABM Bundle, comprised of three developments in Manhattan, NY: Audubon, Bethune Gardens, and Marshall Plaza. The survey was conducted from January through June, 2026. All data collection, tabulation, coding, and analysis were conducted by BFJ Planning.

The survey has 20 questions covering five general categories: (1) general respondent information, (2) satisfaction with renovations, (3) satisfaction with the construction process, (4) satisfaction with temporary accommodations, and (5) satisfaction with the on-site hospitality suite. **A total of 180 surveys were returned from 557 units, a response rate of about 32 percent.**

Summary Results

Respondents to the PACT PC Survey at ABM reported strong overall satisfaction with the PACT conversion, with six out of 10 survey dimensions scoring higher than 4.0 on a 1-5 scale. The highest-rated category was cleanliness during construction (cumulative weighted average score: 4.25)¹ while the lowest-rated was the quality of the hospitality suites (weighted average score 2.75).² While only 19 respondents (15 percent) took advantage of the on-site hospitality suite during construction, this can be identified as an area for improvement.

The PC survey included several open-ended questions for written responses. The most common theme was the quality of materials or workmanship: 48 comments (13% of all comments) expressed negative sentiment on this topic, compared to 31 comments (8% of all comments) reflecting positive views (see Section III).

This report is presented in three parts:

1. Section I introduces the survey project and process.
2. Section II summarizes scalar data for all applicable questions.
3. Section III summarizes written comments received.

Appendix A summarizes individual questions and written comments by question. **Appendix B** provides all written comments verbatim listed by topic and disposition (e.g., positive versus negative comments). **Appendix C** provides a detailed breakdown of comments related to renovations and work orders.

¹ The cumulative weighted average score calculates the average for a ranking question by accounting for differences in response rates across questions. It determines which answer choice was most preferred overall.

² The weighted average score provides the average of scores for a ranking question and determines which answer choice was most preferred overall.

I. Introduction to PACT Survey Project and Process

Survey Project:

BFJ Planning was retained by NYCHA in December 2021 to develop, implement and analyze results of two tenant surveys in the PACT Program:

- (1) Resident General Satisfaction Survey (RGSS) issued eight months to one year after completion of a PACT conversion, and
- (2) Post Construction Survey (PC) issued shortly after completion of PACT renovations.

This report presents summary results of the Post Construction Survey for the ABM Bundle.

The Post-Construction Survey measures tenant satisfaction with key aspects of the PACT conversion process, including renovations, construction and staff, temporary accommodations, and the hospitality suite. The findings inform NYCHA on developer performance, resident-perceived value, and strategies to improve satisfaction across current and future PACT implementations.

Survey Development and Implementation:

Survey questions were developed collaboratively by BFJ Planning and NYCHA staff. The survey was tested internally, and then pilot tested at a NYCHA development in Brooklyn to evaluate survey length, breadth, and effectiveness.

The PC survey was developed in both hard copy and online format, and translated into multiple languages including Russian, Spanish, and Traditional and Simplified Chinese. Data collection at ABM occurred after construction was completed between January and June, 2026.

II. Scalar Questions Summary

This section presents the summary tabulation of results from the ABM PC Survey provided in Tables 1 through 4, which summarize the numerical results from 15 of the 20 survey questions across four categories of interest:

- (1) Satisfaction with renovations;
- (2) Satisfaction with the construction process;
- (3) Satisfaction with temporary accommodations; and
- (4) Satisfaction with the hospitality suite.

Respondents rated performance on a 1–5 scale (1 = lowest, 5 = highest), with 3.0 indicating a neutral response. The analysis reports the share of respondents rating 4.0 or higher (positive) and those scoring 3.0 (neutral), or those scoring 2.0 or lower (negative) (see Tables 1–6).

A weighted average score is reported for each question. This considers the value of each answer choice (from 1-to-5) and summarizes all responses to each question in a single score.

- A weighted average score of **3.0** represents a collective result expressing a **neutral** response or no change after balancing all responses.
- A weighted average score **greater than 3.0** for any question corresponds to a collective result expressing a **positive** response or change (i.e., improvement).
- A weighted average score **less than 3.0** corresponds to a collective result expressing a **negative** response or change.

For example, Question 7 asks about satisfaction with construction staff cleanliness during renovations. A weighted average score of 4.0 indicates responses leaning toward “satisfied” or “very satisfied.” At ABM, the average was 4.25, with approximately 78 percent of respondents rating it 4 or 5.

Reading Summary Tables 1 - 4

Most questions on the NYCHA PACT Post Construction (PC) Survey ask respondents to rate/rank a particular dimension on a scale of 1 to 5, with 1 being "worst" and 5 being "best."

For example, Question 2 asks respondents to rate the quality of work performed in their apartment on a scale of 1 to 5.

Where:
1 = "Needs Improvement"
5 = "Very Satisfied"

2. QUALITY OF WORK:

How happy are you with the overall quality of work performed in your apartment?
Please select the best response on a scale of 1 to 5.

1 (Needs Improvement) ☐ 2 ☐ 3 ☐ 4 ☐ 5 (Exceeds Expectations) ☐

Weighted Average Score
The weighted average score provides the average of scores for a ranking question and determines which answer choice was most preferred overall.

This column provides the percentage of respondents whose ranked response fell within the 4-5 range.

This column provides the percentage of respondents whose ranked response fell within the 1-3 range.

Table 3: Satisfaction with Temporary Accommodations

This table summarizes scalar data on residents' overall satisfaction with temporary accommodations across a range of categories. While the majority of respondents at ABM were able to stay in their apartments during construction, **those who were temporarily relocated expressed satisfaction with their accommodations with a cumulative average weighted score of 3.83**. Cumulative weighted average score accounts for differences in response rates per question.

- 21 percents of respondents to the PC Survey stayed in temporary accommodations during construction, with 79 percent of respondents remaining in their apartment or staying elsewhere during construction (e.g. a friend or family member's home) (Q9).
- **75 percent of respondents felt informed or very informed** about when and where they would be moving, ranking this with a weighted average score of 4.00 (Q10).
- **65 percent of respondents expressed that they felt well supported or very well supported** when making their temporary move, ranking this with a weighted average score of 3.74 (Q11).
- **70 percent of respondents expressed satisfaction** with the quality of their temporary accommodations, ranking this with a weighted average score of 3.80 (Q12).

Table 4: Satisfaction with Hospitality Suite

This table summarizes scalar data collected on residents' opinions about the on-site hospitality suite available at ABM.

- Just 15 percent of respondents indicated that they used the on-site hospitality suite during the workday (Q13).
- **44 percent of the respondents who used the hospitality suite expressed dissatisfaction with the quality of the hospitality suite, ranking this with a weighted average score of 2.75. This was the single lowest weighted average score in the survey at ABM, and is identified as an area for improvement.** (Q14).
- When asked why they did not use the hospitality suite, 45 percent of respondents said it was not convenient to use it. (Q20).

III. Written Comments Summary

Throughout the PACT PC survey, respondents provided written comments that offer valuable insight into individual experiences and resident concerns at ABM. When considered collectively, these comments help identify broader sentiment trends and recurring issues at the development.

Methodology:

To analyze the full set of PC survey comments, responses were coded by both sentiment (positive or negative) and subject matter, using a framework of 28 thematic categories. Comments that addressed multiple topics or expressed more than one sentiment were coded accordingly and, in some cases, counted in more than one category.

Comments coded as N/A or missing are excluded from the analysis. A comment may be coded as N/A or missing under several conditions, including the following:

- A comment restates a response already provided in the associated question (e.g., a resident answered that they did not use on-site services and then wrote in the comment area “I have never used it...”);
- A comment provides information not relevant to the question being asked or the survey (e.g., “I’m never late with my rent.”); or
- A comment expresses no opinion (e.g., “N/A” or “no comment”).

To identify broader trends, each comment is linked to its survey ID to ensure that findings reflect how many respondents express a concern. Each survey is also assigned an overall sentiment—positive, negative, or mixed—based on all submitted comments.

Analysis:

A total of 453 written comments were received through the ABM PACT PC Survey. Of these, 317 were suitable for analysis, representing feedback from 109 of the 180 respondents (61 percent). Because many comments addressed more than one topic or sentiment, the analysis resulted in a total of 378 coded comments.

In terms of sentiment:

- 15 percent of respondents submitted only positive comments
- 23 percent submitted only negative comments
- 23 percent submitted a mix of positive and negative comments
- The remaining 39 percent submitted no suitable comments

As is common with open-ended questions, negative feedback tends to be overrepresented, since respondents are more likely to elaborate on concerns than on satisfaction. This pattern was observed at ABM, where the most frequent positive responses fell into an “other/general” category, reflecting broad satisfaction (e.g., “Everything is good!”) rather than comments on specific issues.

The three most frequently received **positive** comments relate to:

1. **Other/general positive comment** (69 comments received from 36 respondents, or 20 percent of all respondents).
2. **Quality of materials or work** (31 comments received from 26 respondents, or 14 percent of all respondents).
3. **Communication** (16 comments received from 9 respondents, or 5 percent of all respondents).

Negative comments received from ABM residents most frequently referred to the quality of materials or work, issues with the heating system, and responsiveness to work requests or work delays.

The three most frequently received **negative** comments relate to:

1. **Quality of materials or work** (48 comments received from 35 respondents, or 19 percent of all respondents). The most common concerns were quality of work (26 comments), responsiveness to repair requests (20 comments), and quality of paint (13 comments)—all potential priority areas for improvement.
2. **Heat** (23 comments received from 15 respondents, or 8 percent of all respondents).
3. **Responsiveness or work delays** (22 comments received from 17 respondents, or 9 percent of all respondents).

Chart 1 and Table 7 summarize the distribution of written comments by theme and sentiment. Appendix B includes all verbatim comments organized by topic and sentiment, while Appendix C provides a more detailed analysis of key themes related to renovations and work orders, house rules and quality of life, and safety and security.

APPENDIX B

Comments Received from Audubon, Bethune Gardens, Marshall Plaza (ABM) (2023-2026)

PACT Post-Construction Survey

Organized by Summary Category

Note: The PC Survey provided respondents the opportunity to provide written comments. These comments span a wide range of topics and offer valuable insights into individual experiences at ABM.

This appendix provides all written comments, organized by summary topic and sentiment (positive or negative). The number of comments does not equal the number of respondents, since some residents provided no comments while others submitted multiple comments, often on the same topic. Comments that addressed more than one category or sentiment were coded into each relevant category, so some comments appear more than once in this list.

- 40.1 Q.19 [0] | Ref. (408) - My shoulders hurt, the electrical outlets don't work, I can't use the ones in the kitchen.
- 41.1 Q.19 [0] | Ref. (415.2) - Communication about repairs were done in a terrible manner. An representative of the job site construction inform me i can ask worker what did not and did need changes for example; The kitchen had pipe already installed for a washing machine yet, I told construction worker NOT to remove pipes because I recently had a washer set there and plan on get new washer after construction was done. And so the slot I once had a washer is gone. I'm a disabled elderly woman that can't move to much and I need the that spot in my kitchen for washer since it was close to sink without taking much space in the kitchen. This action made by construction workers disappointed me. Another repair was the bathroom. The bathroom had handles I can hold on to to help me maneuver over tub or help me lift myself of the toilet sit as an disabled elder this help alot. Yet another

disappointment from construction workers to inform me about the remove of this everyday tool I need gone.

- 42.1 Q.19 [0] | Ref. (420.2) - door's need to stay locked and need security, don't need worker's that live in the building working in the office we need new workers that we need to get to know and not someone that grow up in the building ant also need a upgrade on painting ant that is it.

- 45.1 Q.19 [0] | Ref. (432) - All of the improvements were good but there were some that were or there were some work that they had to do twice because they ended up very badly done, for example, the floor, the heating pipes were left the same as they were, they changed the valves and they put new ones of very poor quality, practically they don't work or they are worse than they were before
- 46.1 Q.19 [0] | Ref. (438.2) - Generally, I'm satisfied with my renovation, even if there are certain (small) things - some lifted floors, the heat in my bedroom doesn't work, and it's now been three weeks since I submitted a ticket and nobody has come. What I do think they should improve is the security of the building, and review on the cameras who is smoking marijuana because it's a strong smell throughout the halls and sometimes it enters all the way to my bedroom.
- 47.1 Q.19 [0] | Ref. (442.2) - I like everything done in my apartment besides the windows because they do not open wide enough nor my view is longer as calming an refreshing. The new ones make me feel trapped. Thank you.

- 16.2 Q.18 [0] | Ref. (362) - Air conditioner/Heating doesn't work.
- 17.2 Q.18 [0] | Ref. (368.1) - The repairs requests are not fulfilled in a reasonable time. As I write now on the coldest day of the year 1/24/2026 there is no heat in the building. The laundry room is still not open to the residents. No answer was given. Need better maintenance service.
- 18.2 Q.18 [0] | Ref. (372) - I think the only improvement that needs to be done is the heating. When the weather hits below temperatures, there's no heat what so ever. Instead, the only time when the heat comes up is early in the morning. Housing needs to operate the heat properly because it is winter time. We're going to have freezing temperatures this season.
- 19.2 Q.19 [0] | Ref. (400.2) - Received new stove, lovely but it didnt come with any instructions. In installing this heating and ac system, it would be with the correct instalment to be able to work properly as to be able to safely give off the hear or air as needed!
- 20.2 Q.19 [0] | Ref. (401) - The air and the heat please. Thanks.
- 21.2 Q.19 [0] | Ref. (414) - Air conditioner/Heating doesn't work.
- 22.2 Q.19 [0] | Ref. (421.1) - It's horrible. The VNF system does not work. I have not hear and hot water in this bitter cold. Faria Management removed our senior center from the site for over 1 year and 1/2 and has not brought back our community services. We lost our meals, case assistance, activities and services. The laundry does not work either.
- 23.2 Q.19 [0] | Ref. (438.3) - Generally, I'm satisfied with my renovation, even if there are certain (small) things - some lifted floors, the heat in my bedroom doesn't work, and it's now been three weeks since I submitted a ticket and nobody has come. What I do think they should improve is the security of the building, and review on the cameras who is smoking marijuana because it's a strong smell throughout the halls and sometimes it enters all the way to my bedroom.

11. 3 Q.19 [0] | Ref. (406.1) - They did very good work in the apartments and in part of the complex. On the patio or park it's very good, but what happened with the cleanliness everything is dirty. Repulsive, there's no order, we're alone, there's no one to talk to and if we talk to someone from the Faria office they say that they don't know anything. There is a terrible dilenquent who lives in this building, there are more than 60 people with rented apartments. There are a lot of drug deals on various floor. And so the slot I once had a washer is gone. I'm a disabled elderly woman that can't move to much and I need the that spot in my kitchen for washer since it was close to sink without taking much space in the kitchen. This action made by construction workers disappointed me. Another repair was the bathroom. The bathroom had handles I can hold on to to help me maneuver over tub or help me lift myself of the toilet sit as an disabled elder this help alot. Yet another disappointment from construction workers to inform me about the remove of this everyday tool I need gone.
10. 11 Q.19 [0] | Ref. - 17.13 Q.19 [0] | Ref. (434) - My experience was horrible. If I contracted them, I would've fired them. Little to no regard for the quality of life of the tenants. That treatment would not have been acceptable in an affluent building. Extremely disrespectful.

1. 14 Q.18 [0] | Ref. (374) - try to help some of these people to get rid of the ghetto attitude for some reason some of us think that it is so funny to throw garbage on the hallway floors, and let the garbage get to full were it wont fit down the shoot and then feel its the janitors job to take their junk downstairs as well as pooring out the rest of the juice from a bottel before putting it in the garbage bag and spill it
